DIPARTIMENTO DI
BIOLOGIA (DiBio)

Postdoctoral fellowship

We are seeking a highly motivated candidate for a postdoctoral fellowship at the Department of Biology (DIBIO), University of Padua, Italy, in the laboratory of Prof. Alessandra Rampazzo. The research will focus on the generation and characterization of 2D and 3D *in vitro* induced pluripotent stem cells (iPSCs)-based based models for arrhythmogenic cardiomyopathy, to be used as an innovative platform to test new therapeutic approaches and to evaluate the genetic causes of the disease.

In addition to PhD or postgrad experience of at least two years, the candidate must have expertise in using iPSCs. Moreover, he/she should be highly motivated, a good team player, and fluent in English. Experience with animal models is considered a plus.
